Dear Josh:

I wonder if I could bother you for a copy of your manuscript on the "Production of E. coli Protoplasts" which I do not think has yet appeared in print. I am preparing a lecture for October 24 on "Mode of action of penicillin" and I feel that your work is most important here. You promised me a copy of your paper when I was at Madison last June, but I forgot to pick one up before I left. Thank you very much.

Sincerely yours,

Elliot
